

Zetron Partners with Eventide to Offer Logging Recorder

A new partnership between Eventide and Zetron allows Zetron to offer the Eventide NexLog™ logging recorder through its various distribution channels. In addition, NexLog will be integrated with Zetron's MAX Dispatch, MAX Call-Taking and Acom systems to provide customers with a comprehensive, single-supplier incident-management solution.

Redmond, WA, U.S.A., July 31, 2013— Zetron, a leading provider of mission-critical communications solutions, announced that it has signed a partnership agreement with **Eventide** to offer Eventide's NexLog™ logging recorder through Zetron's direct and indirect distribution channels. As a result of this partnership, NexLog will also be integrated with Zetron's **MAX Dispatch, MAX Call-Taking** and **Advanced Communications (Acom)** systems.

The addition of Eventide loggers to Zetron's product portfolio not only gives customers the opportunity to purchase a complete solution from a single supplier, but also provides a comprehensive system that maintains the integrity of call information from the time the call is received to the point where the incident recordings are retrieved from storage.

"We chose Eventide as our primary provider of logging recorders because of the quality of the products they offer and the ability to sell their offerings through our worldwide distribution channels," said Zetron Vice President of Product Management, Kathy Broadwell. "As a result of Eventide's willingness to work jointly with us, we will be able to create new features and capabilities that will provide leadership in the marketplace for both companies."

"We are very pleased to partner with Zetron and provide integrated solutions for communications recording and incident reconstruction," said Richard VanTieghem, Division President at Eventide, Inc. "We look forward to working closely with Zetron and to offering the NexLog products to a wider customer base through our partnership."

About Zetron

For over 30 years, Zetron has been providing mission-critical communications solutions to customers in public safety, transportation, utilities, manufacturing, healthcare and business. With offices in the U.S.A., U.K., Australia and numerous field locations, Zetron supports a worldwide network of resellers, system integrators and distributors. This gives Zetron a global reach as well as a local presence in the regions it serves. Zetron is a wholly owned subsidiary of JVC Kenwood Corporation.
