

Zetron Exceeds 2 Million Hours of P25 CSSI-based Operation

Zetron's Advanced Communications (AcomEVO) system featuring P25 CSSI-based technology leads the industry with over 2 million hours of successful operation at customer sites.

Redmond, WA, U.S.A., March 3, 2014 – Zetron, a leading provider of mission-critical solutions worldwide, announced that implementations of its Advanced Communications (AcomEVO) system utilizing technologies based on the TIA Project 25 (P25) Console Subsystem Interface (CSSI) have logged more than 2 million hours of successful operation at customer sites throughout North and South America and Australia. This far exceeds the performance of any other CSSI-based dispatch console solution currently available and further strengthens Zetron's position as a ground-breaking leader in the application of technologies that utilize the CSSI.

Zetron's AcomEVO using CSSI-based technologies has been implemented for:

- Los Angeles Fire Department, Los Angeles, CA
- Greater Toronto Airports Authority, Toronto Pearson International Airport, ON, Canada
- The Royal Canadian Mounted Police, ON, Canada
- The Cumberland County 9-1-1/Dispatch Center, Crossville, TN
- Polícia Civil (Civil Police), São Paulo, Brazil
- Companhia de Transmissão de Energia Elétrica Paulista (CTEEP), São Paulo, Brazil
- Ergon Energy, Queensland, Australia

"Zetron has a considerable and growing number of successful reference accounts that utilize the CSSI," said Zetron president and CEO, Ellen O'Hara. "Zetron remains committed to delivering solutions that employ the CSSI and other open-standards-based technologies because of the critically important benefits they offer customers. These include improved interoperability, cross-system compatibility, and a broader range of equipment choices—all of which help our customers deliver the high levels of service their communities and constituents require."

About Zetron (www.zetron.com)

For over 30 years, Zetron has been providing mission-critical communications solutions to customers in public safety, transportation, utilities, manufacturing, healthcare and business. With offices in the U.S.A., U.K., Australia and numerous field locations, Zetron supports a worldwide network of resellers, system integrators and distributors. This gives Zetron a global reach as well as a local presence in the regions it serves. Zetron has installed thousands of systems and over 20,000 console operator positions worldwide. Zetron is a wholly owned subsidiary of JVC Kenwood Corporation.
