

## ***Zetron to Demo New DFSI Pathway LIVE at APCO***

***Zetron will be giving live demonstrations of its new P25 DFSI Pathway at the annual APCO conference in New Orleans, Louisiana, Aug. 4-6, 2014. Pathway allows up to four control stations or console systems using the open-standards-based DFSI protocol to connect to a single DFSI base station.***

**Redmond, WA, July 24, 2014** – **Zetron**, will be demonstrating its new **Pathway** P25 Digital Fixed Station Interface (DFSI) gateway live at the annual Association of Public-Safety Communications Officials (APCO) conference in New Orleans, Louisiana, August 4-6, 2014.

Live Zetron **Advanced Communications (AcomEVO)** and **MAX Dispatch** console systems will demonstrate how multiple systems can use the Pathway device to connect to a single open-standards-based DFSI base station. (Pathway supports up to four systems.) In addition, because Pathway works with any manufacturer's dispatch console that is TIA P25 DFSI-compliant, it can be used with both Zetron and non-Zetron solutions.

"Our Pathway product can be extremely useful wherever console-system migration, disaster recovery, or backup-center operations must be supported," said Zetron Vice President of Product Management, Kathy Broadwell. "Pathway can also be critically important in multi-agency, multi-system environments where a single DFSI resource must be accessible to all systems. Zetron has taken the concept of open standards to a new level by providing a device that is designed to work not just with Zetron solutions, but with other manufacturers' open-standards based systems as well."

To see live demonstrations of Zetron's DFSI Pathway at APCO, visit Zetron at booth 1327.

### **About Zetron**

For over 30 years, Zetron has been providing mission-critical communications solutions to customers in public safety, transportation, utilities, manufacturing, healthcare and business. With offices in the U.S.A., U.K., Australia and numerous field locations, Zetron supports a worldwide network of resellers, system integrators and distributors. This gives Zetron a global reach as well as a local presence in the regions it serves. Zetron has installed thousands of systems and over 20,000 console operator positions worldwide. Zetron is a wholly owned subsidiary of JVC Kenwood Corporation. For more information, visit: [www.zetron.com](http://www.zetron.com).
