

## ***Zetron Announces New Video Surveillance and Security Solution***

***Zetron's new Video Surveillance and Security solution improves the ways in which facilities such as government buildings, parking lots, schools, and warehouses can be monitored and protected.***

**Redmond, WA, U.S.A., March 16, 2015** – [Zetron](#), a leading provider of mission-critical communications solutions worldwide, announced that it is now offering a new, advanced Video Surveillance and Security solution that is ideal for both private-sector and public-safety applications, particularly customers who oversee and protect government buildings, parking lots, schools, warehouses, and other sensitive facilities.

The Video Surveillance and Security solution's features improve property monitoring and safety in a number of important ways. It allows recorded video to be digitally "watermarked" and stored for evidentiary purposes. Because it is able to apply analytics—such as item-left-behind and motion sensing—it well suited to campuses and enterprise customers. The system is also very flexible and can scale easily from small operations to very large, enterprise-wide environments. This makes it a cost-effective solution for organizations of any size, including those that expect to expand over time. Additional features include:

- Advanced video-management software for camera control and video manipulation.
- Highly scalable storage.
- Integrated access control, including a badging function.
- Compatibility with a wide range of IP cameras from a variety of manufacturers.
- Two-way audio at the camera site.
- Easy set up; video-management tools that are easy to learn and use.

"Video is becoming an increasingly important tool for customers in mission-critical environments," said Zetron V.P. of Product Management, Kathy Broadwell. "It not only improves situational awareness for first responders, but on its own, can help deter crime. Zetron's new Video Surveillance and Security offering fits well into any organization whose overall goal includes utilizing technology to protect lives and property."

The new Video Surveillance and Security solution enhances the scope and depth of Zetron's comprehensive control-room solutions, which include 9-1-1 call-taking, CAD, mapping, radio dispatch, and logging recorders.

### **About Zetron**

Founded in 1980, Zetron manufactures and provides communications systems designed to equip the entire mission-critical control room. Zetron's integrated solutions combine IP-based dispatch, NG9-1-1 call-taking, voice logging, IP fire station alerting, CAD, mapping, and automatic vehicle location (AVL) systems. They are expandable, interoperable, and able to support remote and geo-diverse operations. Zetron backs its products with technical support and project-management services known for their expertise and responsiveness. Zetron has offices in the United States, the United Kingdom, Australia, and numerous field locations; and a worldwide network of resellers, system integrators and distributors. Zetron has installed thousands of systems and over 25,000 console positions worldwide. Zetron is a wholly owned subsidiary of JVC Kenwood Corporation. [www.zetron.com](http://www.zetron.com)
