

Zetron Introduces MAX Fire Station Alerting at IWCE

Redmond, WA, February 14, 2018 – At the International Wireless Communications Expo (IWCE), being held March 7-8, 2018, in Orlando, Florida, Zetron will be demonstrating its new MAX Fire Station Alerting (FSA) system. Come to **booth 925** to see how the MAX FSA system can integrate with any modern CAD system, deliver voice announcements through VoIP and radio links, as well as help save space by combining dispatch and fire station alerting.

MAX Fire Station Alerting is designed to meet the demands of fire houses today and into the future. With additional alerting, acknowledgement and auxiliary I/O communication capabilities provides a standardized platform that can provide fast, dependable, usable information from the dispatch center.

“With nearly 20 years of experience offering fire station alerting systems, we’re excited to add MAX Fire Station Alerting to the Zetron product line,” said Mark Cranmore, Zetron product manager. “MAX FSA along with our current IP FSA product provides a complete offering for our customers. Our unique approach of extending capability on our MAX Dispatch console provides our customers a cost effective way to integrate dispatching and fire station alerting together as a single, modern, integrated solution that will expand.”

MAX Fire Station Alerting features provides:

- Multiple audio paths
- Multiple levels of redundancy
- Controls and management for fire station peripherals
- A modern User Interface
- Zone alerting and zone lighting
- A voice logger interface

About Zetron

Zetron has been designing and manufacturing integrated mission-critical communications systems since 1980. Its offerings include IP-based dispatch, NG9-1-1 call-taking, voice logging, IP fire station alerting, CAD, mapping, and automatic vehicle location (AVL) systems. They are expandable, interoperable, and able to support geo-diverse operations. Zetron backs its products with technical support, training, and project-management services known for their skill and responsiveness. With offices in the United States, the United Kingdom, and Australia, and a global network of partners, resellers, and system integrators, Zetron has installed thousands of systems and over 25,000 console positions worldwide. Zetron is a wholly owned subsidiary of JVCKenwood Corporation. For more information, visit: www.zetron.com.
