

Zetron Will Demonstrate Broadband PTT Interoperability at IWCE

Redmond, WA, February 21, 2018 – At the International Wireless Communications Expo (IWCE), being held March 7-8, 2018, in Orlando, Florida, Zetron will be demonstrating their MAX-Dispatch and ACOM Command and Control console system's operation with the two major carrier's network-integrated broadband PTT solutions. The consoles will also be operating with SLA's ESChat[®] over-the-top PTT solution and EFJohnson's Atlas[®] Project 25 LMR system.

"A byproduct of preparing our products for broadband is that we are no longer limited to working only with LMR systems," said Randy Richmond, Zetron's Broadband Push-To-Talk Product Manager "Thanks to our broadband integration efforts, and our neutrality towards wireless providers, our dispatch console systems are now able to also work with LTE PTT systems through a variety of IP interfaces and through the most popular solutions providers. Some of these same PTT solutions can be used with FirstNet for interim broadband PTT leading up to MCPTT. These capabilities, including our new map-based dispatching feature, give dispatch centers a pathway to their broadband future."

Zetron invites everyone interested in learning how they can get the Power to Respond to stop by **booth #925** and see Zetron's solutions in action.

About Zetron

Zetron has been designing and manufacturing integrated mission-critical communications systems since 1980. Its offerings include NG9-1-1 call-taking, CAD, mapping, dispatch, voice logging, fire station alerting, and location service systems. They are expandable, interoperable, and able to support geo-diverse operations. What's more, Zetron backs its products with technical support, training, and project-management services known for their skill and responsiveness. With offices in the United States, the United Kingdom, and Australia, and a global network of partners, resellers, and system integrators, Zetron has installed thousands of systems and tens of thousands of console positions worldwide. Zetron is a wholly owned subsidiary of JVCENWOOD Corporation. For more information, visit: www.zetron.com.
